

8 **Agriculture Element**

Please see the next page.

8. Agriculture Element

Ventura County’s temperate climate with warm, wet winters and hot, dry summers coupled with fertile soils, supports the cultivation of a diversity of agricultural commodities, including strawberries, celery, lemons, raspberries, avocados, nursery stock, tomatoes, peppers, cut flowers, cabbage, and kale. According to the State of California, Ventura County ranked eighth among California counties in total crop value in 2017 based on data from the County Agricultural Commissioner’s Annual Crop and Livestock Report.

The areas that sustain agricultural commodity growth have a broad range of characteristics. For example, berry production requires a temperate moist climate, so most strawberry production is found close to the coast, surrounding the cities of Ventura, Oxnard, Camarillo, and Port Hueneme. The climate tends to be dryer and warmer further from the coast, favoring citrus crops. Specifically, the Highway 126 and 150 corridors are prime areas for citrus growth. The fertile soil combined with ideal temperate seasonal temperatures allow lemons, oranges, and mandarins to thrive. Some commodity types, such as avocados, can grow in a variety of climate regions, allowing them to flourish countywide.

The 2017 Crop and Livestock Report indicates that much of the county’s agricultural production occurred on 95,850 acres of irrigated cropland out of a total farmed acreage of approximately 294,000 acres. Of the total farmed acreage, approximately 198,000 acres are considered rangeland.

As with other agricultural regions in California, organic farming is an expanding economic growth opportunity. In Ventura County, organic farms specialize in vegetables and herbs, fruits and nuts, field and seed crops, and cut flowers and nursery production.

Goals and policies in this element are organized under the following headings:

Section	Title	Page
8.1	Agricultural Land Preservation.....	8-2
8.2	Agricultural and Urban Area Compatibility.....	8-4
8.3	Niche and Specialty Agriculture.....	8-5
8.4	Food Security.....	8-6
8.5	Sustainable Farming and Ranching.....	8-7
8.6	Agricultural Resilience	8-9
8.7	Implementation Programs.....	8-10

Farmworker and Farm Family Housing

A sustainable labor force is central to success of the county’s agricultural sector, and access to affordable housing is a key factor. Housing is becoming even more important as the county’s agriculture shifts to more labor-intensive crops and more of the farm/ranch labor in the county works year-round. Goals, policies, and implementation programs related to farmworker and farm family housing are included in Chapter 3, Housing Element.

Agricultural Economics

Goals, policies, and implementation programs related to agricultural economics are in Chapter 10, Economic Vitality Element.

8.1 Agricultural Land Preservation

This section focuses on reinforcing the County’s commitment to agricultural land preservation. Ventura County is a leader in effectively preserving agricultural land through land use policies, intergovernmental agreements, conservation programs, and voter initiatives. The County has taken several actions to direct growth away from agricultural and open space lands including the development of, and adherence to, the Guidelines for Orderly Development, greenbelt agreements, Save Open Space & Agricultural Resources measures, the California Land Conservation Act, and the County’s Initial Study Assessment Guidelines for implementing the California Environmental Quality Act (CEQA).

Guidelines for Orderly Development

Ventura County’s “Guidelines for Orderly Development” (Guidelines) were originally adopted by the Board of Supervisors, all city councils within Ventura County, and the Ventura Local Agency Formation Commission (LAFCo) in 1969. The County revised and readopted the Guidelines in December 1996. The intent of the Guidelines is threefold: (1) clarify the relationship between the cities and the County with respect to urban planning; (2) facilitate a better understanding regarding development standards and fees; and (3) identify the appropriate governmental agency responsible for making determinations on land use change requests. These Guidelines represent a unique, collaborative commitment to encourage urban development within cities whenever and wherever practical; enhance the regional responsibility of County government; and facilitate orderly planning and development in Ventura County. General Plan goals, policies, and implementation programs that integrate the Guidelines are primarily contained in the Land Use and Community Character Element.

Greenbelt Agreements

Beginning in 1967, several cities and the County began adopting greenbelt agreements. These are voluntary agreements between the County and one or more cities to limit development of agricultural and/or open space areas within the unincorporated county. Through greenbelt agreements, cities commit to not annex any property within a greenbelt while the County agrees to restrict development to uses consistent with existing agricultural or open space zoning. There are seven greenbelts in Ventura County covering approximately 164,000 acres collectively.

California Land Conservation Act

The state adopted the California Land Conservation Act in 1965, set forth at Government Code section 51200 et seq. (LCA, also known as the Williamson Act), to provide tax incentives to encourage the protection of agricultural and open space land. In 1969, the County adopted, and has subsequently revised, its “Guidelines for Implementation of the Land Conservation Act of 1965/the Williamson Act” (LCA Guidelines). All land with an Agricultural land use designation in the General Plan is considered an Agricultural Preserve under the LCA. The LCA is implemented through three contract types: LCA Contract, the Farmland Security Zone Area Contract

(FSZA/LCA), and the Open Space Contract (OS/LCA). These contracts intend to preserve agricultural land and discourage its premature conversion to non-agricultural uses. Among other things, the LCA Guidelines establish eligibility criteria for these contracts. In exchange for the preservation of agricultural land, participating property owners receive a reduction of property taxes that are limited to the agricultural value of the property.

Initial Study Assessment Guidelines

The County adopted the Initial Study Assessment Guidelines (ISAGs) in 1992, and comprehensively revised them in April 2011. The ISAGs are intended to inform the public, project applicants, consultants, and County staff of the threshold criteria and standard methodology used in determining whether a project could have significant effects on the environment under CEQA. Regarding impacts to agricultural soils, the ISAGs state that any project that would result in the direct and/or indirect loss of soils designated Prime, Statewide Importance, Unique, or Local Importance on the State's Important Farmland Inventory will have a significant impact. Furthermore, any project that would result in the direct or indirect loss of agricultural soils exceeding certain acreage-loss thresholds identified in the ISAGs will be considered to have a significant impact.

Save Open Space & Agricultural Resources (SOAR)

Ventura County voters first approved the countywide SOAR initiative measure in 1998. The County SOAR initiative requires countywide voter approval (i.e., approval by voters in both the unincorporated county and incorporated cities) of most changes to the General Plan involving the Agricultural, Open Space, or Rural land use designations, and most changes to a General Plan goal or policy related to those land use designations. In November 2016 by countywide vote, SOAR was renewed and extended through 2050. Goals, policies, and implementation programs from the 1988 General Plan that were referenced in the 2016 SOAR initiative are included in this General Plan, with only minor non-substantive revisions.

The policies in this section seek to continue the protection of the County's agricultural lands and capabilities.

AG-1

To preserve and protect agricultural lands as a nonrenewable resource to assure the continued availability of such lands to produce food, fiber, and ornamentals.
[Source: Existing GPP Goal 1.6.1.1, modified, SOAR]

AG-1.1

CAP

Agricultural Land Protection and Preservation

The County shall continue to protect and preserve agricultural land by directing growth away from productive agricultural lands into cities, unincorporated urban areas, or existing communities and by supporting the acquisition or voluntary dedication of agriculture conservation easements. (RDR, MPSP) *[Source: New Policy]*

AG-1.2

Agricultural Land Use Designation

The County shall ensure that discretionary development located on land designated as Agricultural on the General Plan Land Use Diagram and identified as Prime Farmland or Farmland of Statewide Importance on the State's Important Farmland Inventory is planned and designed to remove as little land as possible from potential agricultural production and to minimize impacts on topsoil. (RDR, MPSP) *[Source: Existing GPP Policy 1.6.2.1, modified, SOAR]*

AG-1.3

Greenbelt Agreements

The County shall preserve agricultural land by retaining and expanding existing Greenbelt Agreements and encouraging the formation of additional Greenbelt Agreements. (MPSP, IGC) *[Source: Existing GPP Policy 1.6.2.5, SOAR]*

- AG-1.4 Land Conservation Act Contracts**
The County shall encourage Land Conservation Act (LCA) contracts on farmlands and Open Space lands. (MPSP, IGC, PI) [Source: Existing GPP Policy 1.6.2.3, SOAR]
- AG-1.5 Facilities and Programs to Support Local Agriculture**
The County shall encourage the continuation and development of facilities and programs that support agricultural production and enhance the marketing of county grown agricultural products. [Source: Existing GPP Goal 1.6.1.2, modified; SOAR]
- AG-1.6 Support Economic Viability of Agriculture**
The County shall work to improve the economic viability of agriculture through policies that support agriculture as an integral business to the County. [Source: Existing GPP Goal 1.6.1.3, modified; SOAR]
- AG-1.7 Encourage Purchase of Local Agricultural Products**
The County shall encourage opportunities for Ventura County residents to buy local agricultural products. [Source: Existing GPP Goal 1.6.1.1, modified, SOAR]

8.2 Agricultural and Urban Area Compatibility

The County has measures in place to minimize conflicts between agricultural and urban land uses to ensure the long-term productivity of the agricultural sector, namely the Agricultural/Urban Buffer Policy and the Right-to-Farm Ordinance.

Agricultural/Urban Buffer Policy

The County's Agricultural/Urban Buffer Policy provides policy direction to prevent and/or mitigate conflicts that may arise at the agricultural/urban interface. This policy is intended to protect the economic viability and long-term sustainability of the county's agricultural industry. It applies where urban structures or ongoing non-farming activities are permitted adjacent to land in crop or orchard production or classified by the California Department of Conservation Important Farmland Inventory as Prime, Statewide Importance, Unique or Local Importance farmland. These guidelines apply to projects requiring discretionary approval by the County or a city where the proposed non-farming activity is abutting or on land zoned "Agriculture Exclusive," "Open Space," or "Rural Agriculture," and the farming activity is located outside a Sphere of Influence.

Right-to-Farm Ordinance

The County adopted the Right-to-Farm Ordinance in the late 1970s. It is administered by both the Planning Division through the Zoning Ordinance and by the County Agricultural Commissioner. The Right-to-Farm Ordinance is intended to support and provide a safeguard for existing agricultural and farming operations that could be threatened by encroaching residential development. This is achieved through mandatory disclosure notifications provided to property owners who will be developing residential uses adjacent or near existing agricultural operations. The disclosure informs people seeking to develop or purchase homes of the Right-to-Farm Ordinance and the potential impacts that may be generated by nearby farming operations. The Ordinance also protects farms from nuisance complaints associated with customary farming practices.

The policies in this section seek to enhance compatibility protections that will enhance the long-term viability of agricultural in Ventura County.

AG-2

To minimize conflicts between agricultural operations and urban land uses.
[Source: New Goal]

AG-2.1

Discretionary Development Adjacent to Agriculturally Designated Lands

The County shall ensure that discretionary development adjacent to Agriculturally designated lands does not conflict with agricultural use of those lands. (RDR) *[Source: Existing GPP Policy 1.6.2.6, SOAR]*

AG-2.2

Impacts from Transportation Capital Improvements

The County shall plan transportation and other County capital improvements so as to avoid or mitigate impacts to important farmland to the extent feasible. (SO)
[Source: Existing GPP Policy 1.6.2.4, modified, SOAR]

AG-2.3

Right-to-Farm Ordinance

The County's Right-to-Farm Ordinance shall be maintained and updated as needed to protect agricultural land uses from conflicts with non-agricultural uses, as well as to help land purchasers and residents understand the potential for nuisance, (e.g., dust, noise, odors) that may occur as the natural result of living in or near agricultural areas. (RDR) *[Source: New Policy]*

AG-2.4

Hillside Erosion Control Ordinance

The County shall regulate hillside agricultural grading through the Hillside Erosion Control Ordinance. (RDR) *[Source: Existing GPP Policy 1.6.2.2, modified, SOAR]*

8.3 Niche and Specialty Agriculture

Ventura County's agricultural sector is a leading economic driver. The County has an opportunity to continue to support innovation and vitality in this sector through increased production of niche and specialty agriculture, and utilization of Integrated Pest Management Strategies.

Organic farming is a specialty agricultural sector regulated by the United States Department of Agriculture (USDA). According to the USDA, organic operations must demonstrate that they are protecting natural resources, conserving biodiversity, and using only approved substances. In addition to increasing economic competitiveness, organic farming practices can result in fewer environmental impacts and help to maintain soil health. Organic farming emphasizes sustainable practices, including mixed-cropping patterns and crop rotation, which reduces water usage and maintains the soil structure.

Integrated Pest Management is an ecosystem-based strategy that focuses on long-term prevention of pests through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant crop varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and nontarget organisms, and the environment.

While Ventura County has a successful agricultural economic sector, the County's agricultural lands can also be used to grow specialty agricultural crops, especially those aimed at the growing popularity of locally grown crops and animal products.

AG-3

To promote the expansion of agricultural activities to include new niche and specialty agricultural practices and products. *[Source: New Goal]*

AG-3.1

Small Farms and Specialty Products

The County shall support small and locally owned farms and ranches, the growing of specialty products and innovative and high-value crops, and specialized animal facilities and rearing methods. (RDR, JP) *[Source: New Policy]*

AG-3.2

CAP

Integrated Pest Management Practices

The County shall encourage and support the use of Integrated Pest Management practices to reduce pesticide use and human health risks. (JP, PI) *[Source: New Policy]*

AG-3.3

CAP

Public Education for Agricultural Products and Integrated Pest Management

The County shall collaborate with the agricultural community to provide information on Integrated Pest Management and agricultural products and practices in Ventura County. (JP, PI) *[Source: New Policy]*

8.4 Food Security

A policy framework that supports agriculture is not only beneficial to economic development but is also central to the social well-being of county residents. Food security is based on the notion that everyone has adequate and consistent access to safe and healthy foods, which is a key component to a healthy lifestyle. Lack of access to adequate food sources creates food insecurity, which has numerous social, economic, and health implications. Ventura County's prime agricultural location and robust agricultural economy have created an environment where food insecurity is on the decline compared to statewide and nationwide trends. The increase in food security for all residents is attributed to the prioritization of County programs that focus on awareness of healthy food options and access to food, as well as programs that protect food sources from invasive pests and species that have the potential to disrupt the ability to supply locally produced food. A secure food future ensures that Ventura County communities can continue to flourish, and all residents have access to healthy food options.

The policies in this section seek to protect access to local agricultural products and protection of agricultural resources.

AG-4

To ensure equitable access to fresh, locally grown, and healthy agricultural products for residents throughout the county. *[Source: New Goal]*

AG-4.1

EJ HC CAP

Connections to Local Produce

The County shall strive to enhance access to and consumption of fresh, local produce by encouraging direct connections between local farmers/ranchers and markets, restaurants, institutions, schools, hospitals, food banks, and other businesses. (JP) *[Source: New Policy]*

8. Agriculture

AG-4.2 Growing Food on Public Land

The County shall work with other agencies and institutions to encourage the use of available public land for non-commercial growing of produce, including on college campuses, schools, parks, and public easements, subject to applicable regulations intended to prevent unintended pest and disease impacts to commercial agriculture and suitable plans for ongoing operations and maintenance. (IGC) [Source: New Policy]

AG-4.3 Technological Innovation

CAP

The County shall encourage the use of technology that supports agricultural production, while enhancing environmental sustainability and natural resource conservation. (JP) [Source: New Policy]

AG-4.4 Pest Management

CAP

The County shall continue to monitor leading research findings on methods and technologies for reducing harm to the agricultural sector from invasive plants, pests, and diseases and modify agricultural practices when appropriate and feasible. (SO) [Source: New Policy]

AG-4.5 Certified Farmers' Markets and Community Supported Agriculture

EJ HC

The County shall support certified farmers' markets, community supported agriculture (CSAs) operations, and other similar activities, by working with local communities, local agricultural groups, and the California Department of Food and Agriculture (CDFA) Certified Farmers Market Program, particularly in communities that are underserved by healthy food purveyors. (IGC) [Source: New Policy]

8.5 Sustainable Farming and Ranching

Sustainable farming and ranching practices ensure that the viability of the land for future agricultural use can continue into the future. The use of fertilizer in Ventura County accounted for approximately 60 percent of countywide agricultural greenhouse gas (GHG) emissions in 2015. Fertilizers commonly used in commercial agriculture decompose over time in soil to produce nitrous oxide (N₂O) gasses, which are harmful GHGs. The addition of these GHGs contribute to the overall pollution emissions in the County.

Truly sustainable farming and ranching also requires agricultural practices and operations that are less dependent on fossil fuels, an energy source that is typically used to run most agricultural related equipment. In 2015, gasoline- and diesel-powered off-road agricultural equipment other than irrigation pumps accounted for 27 percent of countywide agricultural GHG emissions. For existing diesel equipment, renewable diesel is a cost-effective alternative fuel option. This reduces the need for equipment modifications or replacements. Although the supply of renewable diesel is currently far exceeded by that of conventional diesel, the state is already making efforts to increase the supply of renewable diesel in the short- and long-term through the Low Emission Diesel regulation and the Low Carbon Fuels Standard.

The policies in this section seek to enhance the sustainability of agriculture in the county by transitioning away from fossil fuels to renewable energy sources.

AG-5

To encourage sustainable farming and ranching practices that promote resource conservation and reduce greenhouse gases. *[Source: New Goal]*

AG-5.1

HC CAP

Inorganic Nitrogen Based Fertilizers

The County shall encourage farmers to reduce fertilizer application and transition to products that reduce or avoid nitrous oxide (N₂O) emissions, such as organic composting and enhanced efficiency fertilizers. (MPSP) *[Source: Existing El Rio/Del Norte Program 1.2.3.1, modified]*

AG-5.2

CAP

Electric- or Renewable-Powered Agricultural Equipment

The County shall encourage and support the transition to electric- or renewable-powered or lower emission agricultural equipment in place of fossil fuel-powered equipment. (PI, JP) *[Source: New Policy]*

AG-5.3

CAP

Electric- or Renewable- Powered Irrigation Pumps

The County shall encourage farmers to convert fossil fuel-powered irrigation pumps to systems powered by electric or renewable energy sources, such as solar-power. (SO) *[Source: New Policy]*

AG-5.4

CAP

Alternative Irrigation Techniques

The County shall encourage farmers to use the water-saving irrigation techniques designed to reduce water consumption. (RDR, JP) *[Source: New Policy]*

AG-5.5

CAP

Carbon Farming Practices

The County shall encourage and support the efforts of resource conservation districts, farmers, and other stakeholders to expand carbon farming practices, such as reduced tilling, cover-cropping, composting, biochar, and other activities that both reduce greenhouse gas (GHG) emissions and increase carbon sequestration and storage. (JP) *[Source: New Policy]*

8.6 Agricultural Resilience

A resilient agricultural sector is key to the longevity of agricultural production in Ventura County. Recent shifts in weather patterns and surface temperatures because of climate change have created vulnerabilities that can affect the success of agricultural production. An agricultural sector that is resilient and adapts to anticipated climatic changes has a greater potential to continue to remain a primary economic driver for the County. The policies in this section seek to enhance the resilience of agriculture in Ventura County to changes in the environment.

AG-6

To increase the resilience of the agricultural sector. *[Source: New Goal]*

AG-6.1 **Monitor Climate Change Research**

The County shall support and monitor research on the effects of a changing climate on the agricultural industry within Ventura County. (PSR) *[Source: New Policy]*

AG-6.2 **Drought-Tolerant Crops**

The County shall engage the agricultural sector to understand the tolerance of current crop mixes to withstand increased temperatures, disease, and pests, and explore options to diversify and shift to drought-tolerant crops that could be cultivated in a warmer environment. (JP) *[Source: New Policy]*

Additional goals and policies related to agricultural resiliency are included in:

- Chapter 6, Conservation and Open Space Element,
- Chapter 7, Hazard and Safety Element, and
- Chapter 9, Water Element.

8.7 Implementation Programs

Programs	Implements Which Policy(ies)	Responsible Supporting Department(s)	2020 – 2025	2026 – 2030	2031 – 2040	Annual	Ongoing
<p>A Public Outreach on Land Conservation The County shall develop and implement a public outreach program to inform farmers, ranchers, and the public to encourage participation in Land Conservation Act (Williamson Act) or privately funded conservation easements. <i>[Source: New Program]</i></p> <p>CAP</p>	AG-1.1 AG-1.3 AG-1.4	RMA AGC CA	■				■
<p>B Right-to-Farm Ordinance The County shall periodically review and update the Right-to-Farm Ordinance when necessary to raise public awareness (including within the local real estate industry) of the Right-to-Farm provisions. <i>[Source: New Program]</i></p>	AG-2.3	AGC RMA					■
<p>C Locally-Grown Products Sales Incentives The County shall develop a program that encourages sales and distribution of locally grown produce to local retailers, restaurants, and markets. The program will encourage residents to select locally grown food products for freshness, local economic development benefits, and reduced greenhouse gas (GHG) emissions. <i>[Source: New Program]</i></p> <p>EJ HC CAP</p>	AG-3.1 AG-4.1 AG-4.2 AG-4.5	AGC CEO	■				■
