New State Laws Require Every Home
to have a Carbon Monoxide Detector

Carbon Monoxide Poisoning Prevention Act of 2010

On May 7, 2010, Governor Arnold Schwarzenegger signed the Carbon Monoxide Poisoning Prevention Act of 2010. This act was created due to the alarming statistics related to carbon monoxide poisonings. According to the American Medical Association, carbon monoxide is the leading cause of accidental poisoning deaths in the United States. The federal Centers for Disease Control and Prevention estimate that carbon monoxide kills approximately 500 people each year and injures another 20,000 people nationwide.

The need for a carbon monoxide detector in your home is great because a person cannot see or smell carbon monoxide. It is estimated that equipping every home with a carbon monoxide device would cut accident-related costs by 93 percent. Carbon monoxide devices provide a vital, highly effective, and low-cost protection against carbon monoxide poisoning.

Protect your family and install California approved carbon monoxide device in your home today. Do not delay this life saving measure.

When do I need to install a carbon monoxide device?

- Carbon monoxide devices must be installed in all **single-family dwellings by July 1, 2011**.
- All other dwelling units must have carbon monoxide devices installed by January 1, 2013.
- This law applies only to homes and dwelling units that have a fossil fuel burning heater or appliance, fireplace or an attached garage.

Where should I install the carbon monoxide devices?

- Outside of each separate dwelling unit sleeping area in the immediate vicinity of the bedroom.
- On every level of a dwelling unit including basements.
- As specified in the manufacturer's installation instructions and in accordance with NFPA 720.
